Pete,

The steel sets are the arch material or straight I-beam ? If it's the arch sets, then the diameters may be of limited use after moving past the overburden / colluvial rock.

Thank you,

Steve

Hi Steve,

Here is what Todd has at Gladstone for project:

37 steel sets ` enough for 110 to 120 ft.

Channel Iron

2-10"x25'

15- 8"x15'

10-12"x15'

2-14"x35'

70- 40lb. Rail30'

working on procuring 2 48 ft x 8 ' rail flat cars for bridge..

Hope this helps,

Pete
